## Certificate III in Roof Plumbing

Get recognized as a roof plumber.

This qualification provides a trade outcome in roof plumbing which works with roof drainage systems on residential, commercial and industrial buildings. Roof plumbers install and repair systems that collect and dispose of stormwater, including gutters, eaves, downpipes, and rainwater tanks.

Roof plumbers need to understand how water behaves under different conditions, including the weather and temperatures. They handle various roofing structures and materials, such as metal, polycarbonate, fibreglass or glass.

Being a qualified roof plumber, there are many opportunities to find your own niche and become your own boss. This qualification is suitable for anyone currently working as a roof plumber in a construction environment.
