

External Waterproofing Skill Set

Understand the external waterproofing process.

This informative one day course covers specific skills on how to prepare for waterproofing and how to apply waterproofing to external wet areas. In a national building industry survey, waterproofing topped the list of the '10 most common defects' in every state and territory.

This course is designed for anyone looking to better their understanding of the external waterproofing process and its application, as well as those looking to branch out into the internal waterproofing field.

External Waterproofing Skill Set

How will undertaking this course benefit you?

With a large percentage of housing insurance claims across NSW being directly related to waterproofing issues the demand for remedial work is huge, and the expectation of correct waterproofing in new projects is more important than ever. This is a great skill set to take into the job site regardless of your trade.
